DURAFON 4x

4 LINE

DURAFON PRO

4 - 32 LINE

Cordless communications for every business.

EnGenius Durafon from Aristel is the cordless communications tool that goes the distance in any business.

EnGenius Durafon uses two-way radio technology to cover the extra distance needed for factories, farms, offices, warehouses, car dealerships, motels, resorts, caravan parks, nurseries, hospitals homes and more.

Durafon provides mobility, flexibility and freedom. Add the many user-friendly convenience features and you have the ultimate in versatile, powerful cordless phone systems ideal for businesses of every size.

The EnGenius advantages

PERSON-TO-PERSON CALLING

If your people are on the move, no longer do they have to be paged or called on mobile when a call comes in. When installed with a keyphone system, reception can simply direct the call to the individual's EnGenius handset, wherever he or she may be on site. Caller ID to the handset allows the employee to take the call or send to voicemail. Features including group paging (up to nine groups) and broadcast are ideal where emergency contact may be required

ULTRA LONG RANGE

All models offer an ultra long range of 5 km to 10 km, depending on environment. The more open the space, the greater the distance covered. A range of over 5km is usual for Durafon in open areas.

COST SAVINGS

Personnel can keep in contact with no-cost handset to handset calls instead of using mobile phones on site. Consider the savings this could give your business.

OPEN SPACE COVERAGE:

up to **20,000 hectares**

Mining, primary production.

IN-BUILDING COVERAGE:

up to **12 floors per base**

Hotels, office blocks.

The industrial strength cordless

The double coated rubber case ensures durability in any work environment. The case is shock-resistant and features an integrated hand grip and low profile antenna.

One or four line models. Up to 90 handsets

- > Durafon 1x SN 902 single line, with one line per base unit and up to 9 handsets. Up to 4 base units can be linked with up to 36 handsets.
- > Durafon 4x SP 922 with four lines per base unit, up to 90 handsets.
- > Durafon SP 9228 Pro multi-base system, with four lines per base unit, up to a maximum of 8 base units and 90 handsets.

Expandable system design

EnGenius Durafon is flexible. Additional handsets and base units are available separately. Build a system that grows as your needs grow.

EnGenius Durafon 1x SN 902 features:
